MUHAMMAD ZIYAN

Backend Developer — Node.js / NestJS

Karachi, Pakistan | +92 313 844 7708 | ziyanazizz23@gmail.com | LinkedIn | Portfolio

SUMMARY

Backend developer with hands-on experience shipping production features in Node.js and NestJS during a 6-month internship at Paz Technologies. Comfortable building multi-tenant architectures, real-time systems with Socket.io, and JWT-secured APIs. Looking for a full-time or contract backend role where I can keep building on that foundation.

SKILLS

Backend: Node.js, Express.js, NestJS, TypeScript

APIs: REST API design, JWT authentication, Socket.io / WebSockets, third-party API integration

Databases: PostgreSQL, MongoDB, MySQL — schema design, query optimization, multi-tenant data isolation

Frontend: HTML5, CSS3, responsive UI basics

Tooling: Git, GitHub, Postman, Vercel, npm

EXPERIENCE

Backend Developer Intern — Paz Technologies, Karachi *Nov 2025 – Apr 2026*

- Built and shipped backend features as part of a 4-person engineering team using NestJS and Node.js, with releases going live to real users on a 5-month cycle.
- Designed and implemented 15+ RESTful API endpoints spanning authentication, data retrieval, and core business logic.
- Secured API access with JWT authentication — token issuance, validation middleware, and role-based route protection, built from scratch.
- Improved MongoDB query performance on high-frequency endpoints through schema restructuring and indexing to support multi-tenant data isolation.

PROJECTS

Multi-Tenant SaaS Backend — *NestJS, Node.js, MongoDB, JWT* GitHub ↗

- Architected a multi-tenant backend supporting up to 5 isolated client environments with per-tenant data separation and role-based access control.

HR Management System — *NestJS, Node.js, MongoDB* GitHub ↗

- Built a full employee records and leave management system with 10+ REST endpoints covering onboarding, leave requests, approvals, and status tracking.

Real-Time Chess App — *Node.js, Express, Socket.io* GitHub ↗

- Implemented real-time bidirectional game-state sync across 2–5 concurrent connections using Socket.io.

EDUCATION & CERTIFICATIONS

Intermediate (Pre-Engineering) — In progress

Matriculation — 2024

Web Development Certification — SMIT (Saylani Mass IT Training)
